Speakers and topics

GPTunneL clients from business, industry and education: leaders and specialists who put AI to work, develop products and train teams.

MTS · CICADA8

Alexey Kuznetsov

CEO of CICADA8

AI vs. AI: how we responded to agentic attacks. Manual pentesting depth at scanner scale

HSE University

Sanan Gamidov

Deputy Director, HSE Graduate School of Business

AI opportunities (generative models) for small and medium-sized businesses

Severstal-infocom

Boris Mayatsky

Head of Generative AI Development

A tunnel into the world of external generative AI models

GPTunneL

Ilya Trikoz

CEO and co-founder of GPTunneL

GPTunneL's year in review: Russian GROM models, the Grom Agent announcement and AI data centre development plans for 2027

In Ilya Trikoz's talk

Russian GROM models

Developing models for text, code, images, video, audio and music.

Introducing Grom Agent

A personal agent for working on your computer. Examples of development with agents: "supercoding" and Calab.

AI data centres: plans for 2027

Developing computing infrastructure to meet the growing needs of Russian AI models.

Programme as of 14 November 2026. Subject to change.
